

FARHAN BAYNA AFDILLAH

Informatics Student | Seeking IT / Programming Internship

Ciracas, East Jakarta | 0855-9120-3070

farhanafdillah2435@gmail.com | Born: Jakarta, March 24, 2005

PROFESSIONAL SUMMARY

Sixth-semester Informatics student at Universitas Bina Sarana Informatika with a strong interest in IT and programming. Hands-on experience designing and securing network topologies with Cisco and Mikrotik devices, building a mobile ordering application with Flutter and PHP, and developing a database-driven desktop application with Java and MySQL. Actively involved in campus event organizing. Looking for an IT/programming internship to apply and grow my technical skills in a real-world environment.

WORK EXPERIENCE / PROJECTS

Network Topology & Security Design January 2026 – April 2026

A network infrastructure project focused on designing a secure network topology using Cisco and Mikrotik devices.

- Designed and developed a network topology using Cisco and Mikrotik hardware.
- Implemented network security measures to protect data and control access across the network.
- Configured and tested devices to ensure stable, reliable connectivity between network segments.

Medical Equipment Ordering Desktop App July 2025 – February 2026

A desktop application that manages medical equipment orders, from product and customer data to payment receipts.

- Developed a desktop application for ordering medical equipment using Java (Swing) with a custom GUI built in NetBeans.
- Designed a MySQL/MariaDB database and connected it to the application through JDBC to manage products, categories, customers, suppliers, orders, and payment receipts.
- Generated printable reports and receipt notes using JasperReports and Jaspersoft Studio.

Warteg Menu Ordering Mobile App August 2025 – November 2025

A mobile application that lets customers browse and order menu items from a warteg (Indonesian local eatery).

- Developed a cross-platform mobile app for ordering warteg menu items, using Flutter for the front-end.
- Built the back-end with PHP to handle menu data and order processing.
- Integrated the front-end and back-end so customers can browse the menu and place orders smoothly.

Network Routing Configuration September 2025 – December 2025

A network configuration project on dynamic routing and interoperability between different routing protocols.

- Configured dynamic routing protocols, including OSPF and EIGRP.
- Performed route redistribution between different routing protocols to enable communication across routing domains.
- Verified routing tables and troubleshot connectivity issues to ensure correct network operation.

EDUCATION

Universitas Bina Sarana Informatika 2023 – Present

Bachelor's Program in Informatics | Semester 6

ORGANIZATIONAL EXPERIENCE

Event Organizer — Futsal Komzustar Cup

- Coordinated an inter-student futsal tournament, including match scheduling and team coordination.

SKILLS

Technical: Computer Networking (Cisco & Mikrotik), Routing Protocols (OSPF, EIGRP), Java (Swing), Flutter, PHP, MySQL/MariaDB, JDBC, NetBeans, JasperReports, Mobile & Desktop App Development, Microsoft Office

Soft Skills: Teamwork, Event Coordination, Communication, Time Management, Problem Solving

CERTIFICATIONS & TRAINING

- CCNA: Introduction to Networks — Cisco Networking Academy

LANGUAGES

- Indonesian (Native)
- English (Basic / Passive)
